

PAVAN SAI RAPETI

FULL STACK DEVELOPER

Hyderabad, India | pavansairight@gmail.com | www.pavansairapeti.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience building scalable web applications and enterprise platforms using React.js, Next.js, TypeScript, JavaScript, Node.js, Express.js, Python, PostgreSQL, and REST/GraphQL APIs. Experienced in frontend architecture, backend services, real-time applications, network automation, API security, database design, testing, and cloud-native deployments. Proven ability to improve application performance, build reliable enterprise solutions, and collaborate with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, HTML5, CSS3

UI & State: Redux-Saga, Tailwind CSS, Material UI, Styled Components, Storybook, React Flow

Backend: Node.js, Express.js, Python, Flask, Java, C#, ASP.NET, REST APIs, GraphQL, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, SQL

Testing: Jest, React Testing Library, Cypress, Enzyme, Mocha, TDD

Cloud & DevOps: AWS, Google Kubernetes Engine (GKE), Docker, Kubernetes, CI/CD, Git, GitHub

Networking & Automation: SSH, Telnet, SNMP, Paramiko, Netmiko

Tools & Practices: Vite, Webpack, Babel, ESLint, Prettier, Swagger/OpenAPI, Jira, Confluence, Scrum/Agile

PROFESSIONAL EXPERIENCE

TCP Network Services | Programmer | May 2025 – May 2026

TCP Automation Platform — Python (Flask), React, PostgreSQL, Tailwind CSS, WebSockets, Paramiko, Netmiko

- Architected modular Flask Blueprint-based REST APIs with WebSocket communication for live progress tracking across 300+ concurrent device operations, using intelligent thread pooling to improve backup execution.
- Designed a responsive React frontend with React Flow and Dagre for interactive device discovery, network topology mapping, topology snapshots, and drag-and-drop editing.
- Implemented multi-protocol device connectivity across SSH, Telnet, and SNMP with automatic fallback, supporting 300+ device types from multiple vendors using Paramiko and Netmiko.
- Built a parallel command-execution engine with real-time tracking and Excel/ZIP export, supporting 50+ concurrent worker threads.
- Engineered JWT and Active Directory/LDAP authentication with role-based access control, rate limiting, and audit logging for enterprise security.
- Developed PostgreSQL database abstraction with connection pooling, transaction management, and schema migrations for high-concurrency workloads.
- Automated Excel compliance reporting with conditional formatting and PASS/FAIL/PARTIAL_PASS status indicators.
- Implemented alert aggregation, support-ticket creation with MFA, and email integration for incident response workflows.

LTIMindtree | Senior Software Engineer | August 2022 – March 2024

Digital Dashboard for Nokia — React, TypeScript, JavaScript, Jest, Tailwind CSS

- Developed and enhanced responsive dashboard experiences, including curated onboarding and A/B testing to improve customer engagement.
- Strengthened frontend code quality and security through library maintenance, dependency updates, and consistent development practices.
- Mentored interns and junior developers through code reviews, technical guidance, and frontend best practices.

Bekaert E-commerce Platform — React, TypeScript, Jest, Enzyme

- Improved component consistency and maintainability across the e-commerce frontend through reusable React patterns and testing practices.
- Maintained and updated frontend libraries to support security, stability, and new product requirements.

MSC Direct E-commerce Migration — React, Node.js, Express.js, MySQL, GraphQL, REST APIs, Tailwind CSS

- Led migration of an e-commerce system from PHP to React, delivering reusable component-based interfaces and responsive user experiences.

- Built Node.js and Express.js backend services and designed GraphQL/REST APIs for product search, order management, and shipment tracking.
- Documented APIs with Swagger.js and strengthened quality using Jest unit tests and Cypress end-to-end testing.

Tata Consultancy Services (TCS) | System Engineer | January 2020 – August 2022

Internal Digital Dashboard — Next.js, React, Tailwind CSS, Node.js, Express.js, GraphQL, REST APIs, Swagger.js, Jest, Cypress

- Developed responsive web applications using React and Python, contributing to a 25% improvement in customer satisfaction.
- Enhanced Jest and Enzyme test coverage and practices, contributing to a 40% reduction in post-deployment bugs.
- Optimized GraphQL queries, improving data efficiency by 40% and reducing load times by 15%.

CITI Rate Entry System — React, TypeScript, C#, ASP.NET, Python, Java, Webpack, Three.js

- Optimized frontend assets with Webpack, improving application load times by 20%.
- Developed 3D visualizations using Three.js within React applications.
- Collaborated with 5+ product managers and UX designers across 3 major React projects in Agile teams.
- Conducted 20+ code reviews and mentored 5 junior developers in React, TypeScript, and Python.

Nuvo Horizons | Freelance Developer | August 2024 – December 2024

Student College & Program Platform — React.js, Java, Kotlin, REST APIs, AWS, PostgreSQL, MongoDB

- Built a platform enabling students to explore colleges and programs, review admission requirements, and submit applications.
- Used AWS, PostgreSQL, and MongoDB to support cloud infrastructure, registration workflows, and application data.

EDUCATION

Computer Application Development — Conestoga College, Waterloo, ON, Canada | 2024

B.Tech (Mechanical Engineering) — GMR Institute of Technology, India | 2019
